To Our Friends of Roswell.

Kind Friends:—We are in the midst of what is known as our Harvest Festival, an effort that we put forth every year to raise means to aid in the rescue and social work of the Salvation Army. We have been enabled through the aid of kind friends to rescue and receive into our different Rescue Homes, 38,000 fallen girls in ten years, also in eight years we have assisted over 14,000 ex-criminals to lead a better life, through the means of our Ex-criminal Homes.

This work is entirely supported by our outside friends, as we have no other means of support, and surely everyone will agree with me that this branch of the work is worthy of your support. I am very desirous to assist this noble cause, and invite our friends to contribute whatever they feel disposed to give in the way of money, farm produce, groceries, fowl, pieces of furniture, bed clothing or anything that may be sold at our sale on Saturday night next, in our tent, the proceeds of which will be devoted as stated above.

Will you help us to rescue and lead to a better life some mother's daughter or son? If so, send or bring along your donation, whether much or little. Remember, you may be in distress some day. Then do unto others as you would like them to do unto you. Send a Postal card to Box 267, and we will call for your contributions.

Judge W. W. Gatewood came in on last evening's train from Amarillo and left on the same train with his wife for Carlsbad where he will attend court, being one of the attorneys in the Clabe Merchant murder case. The Judge says the Amarillo Citizen sends word for us to be patient on the depot question until they have finished the new brick depot there and the we can do as they have done. However, the Judge says this is not official.

Peculiar Privileges.

The speaker of the house of commons has several peculiar privileges. Every year he receives a gift from the master of the buckhounds of a buck and doe killed in the royal preserves. This custom goes back so far that there is no record of it. Later in the year the speaker receives another tribute from a different source. The donors on the second occasion are the Cloth Workers' company of London, who send to the speaker of the house of commons and to several of his majesty's ministers a generous width of the best broadcloth to be found in England.

Her Audience.

"How are you getting on with your music, my dear?" inquired a lady of her niece. "Well, of course," replied the niece diffidently. "It wouldn't be proper of me to compliment myself, but some of the neighbors have told me they have stayed awake at night for hours listening to my playing."

WORK AND LOOK YOUNG.

You Will Succeed if Your Heart Is in Your Labor.

Is it hard work that makes people grow old or is it because they do not have enough to do, or, rather, do not find the thing they are best fitted to do? The hardest worked people in the world are the actresses, yet some of them, without mentioning names, are sixty and some play the parts of lovers and boisterous young tomboys at an even greater age.

The Americans are the hardest worked people in the world, yet foreigners call us a young looking nation. Nothing makes a people look so young as liberty. There is none of the cramped, caste restricted blight upon our people that is seen in Europe. The oldest looking people in the world are not those who have worked hardest, but those who have not worked at all. If one would see them he wants to go to the fashionable watering places. There he will see comparatively young men and women who have never worked, either with body or mind, driven around in bath chairs or hobbling about on canes, while men absorbed in business are often quite robust at seventy.

Where hard work ever killed a man laziness and inaction have killed a score. It is the class that feels above work that nature has little use for. Work and look young!—Boston Globe.

The Rock That Moses "Smote."

The famous "Rock in Horeb," anciently called the "Rock of Massah" and at present known throughout the orient as the "Stone of the Miraculous Fountain," being the identical rock which Moses struck with his rod in order to give water to the children of Israel, is religiously preserved and guarded even down to this late date. Dr. Shaw in his book "Shaw's Travels" says: "It is a block of granite about six yards square lying tottering and loose in the middle of the valley of Rephidim and seems to have originally been a part of Mount Sinai."

The action of the waters of that miraculous fountain, as related in the seventeenth chapter of Exodus, hollowed a channel about two inches deep and more than twice that broad across the face of the rock, this not upon unsupported testimony, but upon the word of such men as the Rev. Dr. Shaw, Dr. Pocock, Lieutenant Clogher and other eminent scholars and travelers. M. Beaumont, a German gentleman who visited the "Rock of Horeb" in the year 1507, declares his belief in the generally accepted story of it being the rock of Moses' famous fountain.

Famous Moated Houses.

The moat which so often surrounded halls and castles in the old days is now generally dry and filled up, but some remarkable specimens still remain. Perhaps the finest example of a moated house is Helminghap Hall, the seat of Lord Tollemache, in Suffolk, about eight miles from Ipswich. The drawbridge still remains, and it has been raised every night for more than 300 years, the ancient precaution being observed even though the need for it has long passed by. The moat which surrounds Leeds castle, near Maidstone, is so wide that it may almost be called a lake. The ancient Episcopal palace at Wells is surrounded by walls which in close nearly seven acres of ground and by a moat which is supplied with water from St. Andrew's well. A venerable bridge spans the moat, giving access through a tower gateway to the outer court.—London Standard.

Life After Death.

A German biologist has been investigating the question of the activity of animal bodies after death and has published some suggestive conclusions. It appears that death is not instantaneous throughout the physical organism, for it has been observed that many of the different tissues continue active for a considerable period after the time when the animal is assumed to be dead, particularly in the case of the lower animals. Cells from the brain of a frog, for example, have been kept alive for over a week when held in certain solutions, and the heart of a frog has been known to beat for many hours after being removed from the dead body. The hearts of turtles and snakes will beat for days or even a week after death.—Harper's Weekly.

One Was Enough.

"You love my daughter?" said the old man. "Love her?" he exclaimed passionately. "Why, I could die for her! For one soft glance from those sweet eyes I would hurl myself from yonder cliff and perish, a bleeding, bruised mass, upon the rocks 200 feet below!" The old man shook his head. "I'm something of a liar myself," he said, "and one is enough for a small family like mine."

His Bad Memory.

"I suppose," said the condoling neighbor, "that you will erect a handsome monument to your husband's memory?" "To his memory?" echoes the tearful widow. "Why, poor John hadn't any. I was sorting over some of the clothes he left today and found the pockets full of letters I had given him to mail."

Heated.

Jones—Wonder what made Mrs. Sutton look so heated when she picked up that photograph from her husband's office desk? Jaynes—Good reason for becoming heated. It was one of his old flames, you know.—Boston Transcript.

Betting Philosophy.

"Do you think that betting is wrong?" "It depends on circumstances," answered the town oracle. "If you can't afford to lose it's wrong; if you can't it's merely silly."—St. Louis Lumberman.
